

Priya Nair

SQL | Python | dbt Core or dbt Cloud | Senior Data Engineer

priya.nair@email.com | linkedin.com/in/priyanair

SUMMARY

Senior Data Engineer with 7 years of experience designing and optimizing scalable data pipelines using SQL, Python, dbt, and cloud data warehouses. Adept at driving significant cost reductions and improving data reliability, I am poised to enhance Databricks' Lakehouse environment by building robust data products and optimizing performance.

EXPERIENCE

Stripe - Data Engineer | Jun 2021 - Present

- Cut data warehouse costs by \$220K annually through partition pruning and clustering optimizations in BigQuery.
- Reduced pipeline failure rate from 18% to 2% by rebuilding legacy Airflow DAGs with modular task groups.
- Designed and maintained 40+ dbt models powering executive dashboards used by 300 internal stakeholders.
- Migrated 6 legacy ETL jobs from Informatica to dbt Core, completing 3 weeks ahead of schedule.

Shopify - Junior Data Engineer | Jun 2018 - May 2021

- Built ingestion pipelines for 12 third-party data sources using Python and Google Cloud Dataflow.
- Automated daily data quality checks reducing manual QA time by 15 hours per week.
- Developed Looker dashboards for Growth and Marketing teams, improving data accessibility.

SKILLS

Data and Analytics: SQL, dbt Core, BigQuery, Data Modeling Principles, Data Quality, Looker

Programming: Python

Tools and Platforms: Airflow, Google Cloud Platform, Dataflow, Git, CI/CD

AI and Automation: Data Pipeline Automation

EDUCATION

B.Tech Information Technology, VIT University, 2018
